Wedding Consultant Certificate

THERE'S NO QUESTION THAT EDUCATION can enrich your life. Whether you are interested in starting your own business, want to make a career change or just want to learn new things, we have courses that will help you expand your horizons personally and professionally. Through workshops, seminars, short courses and certificate programs, we offer "Education for Every Stage of Your Life."

Art of Digital Photography Certificate

Learn from an Official White House photographer whose work has been exhibited at the US Capitol and Smithsonian in Washington DC. This is an introductory course in creating powerful, emotional, and technically solid still imagery using a digital SLR camera and computer. We'll explore how to take complete control of the camera to shoot strong images in challenging environments.

Event Management Certificate

Great events don't just happen by accident. Truly memorable events are the result of a well thought out plan that is executed with creativity and with attention to detail. In a few short weeks you can learn how to create exciting themed social events and stimulating corporate events that will be remembered for years to come.

Wedding Consultant Certificate

This certificate program is designed for individuals who are interested in working part- or full-time as a wedding coordinator. The program is ideal for current and recent brides, venue planners, vendors who want to add wedding consulting to their list of services, or anyone who is making a career change and wants a rewarding new career.
