Pomona, CA 91768

T: 909.869.2288

F: 909.869.4398

W: www.ceu.csupomona.edu

As one of the university's major outreach tools specifically created to link California State Polytechnic University, Pomona (Cal Poly Pomona) to the numerous and diverse constituents and communities in Southern California, the College of the Extended University (CEU) provides stimulating and dynamic continuing education programs to our customers in new and innovative ways.

We currently offer over 1,500 courses ranging from credit courses and degree programs to business and management, trade and technical certificates and personal enrichment classes.

Our programs are designed to meet the needs of working professionals (non-traditional students) wanting to enhance their career opportunities along with those traditional students needing additional programs not offered through the university.

Courses for Business and Industry

Certificate programs are a key educational offering at CEU. Thousands of people have benefited from completing a CEU certificate program, and these programs continue to be one of the core competencies of the college. Expanding to meet the needs of the workforce, we offer many types of non-credit certificates, stand-alone courses and workshops including those focusing on such subjects as human resource management, supervisory training, six sigma, supply chain management, event planning, geographic information systems, plastics engineering, construction management and food safety. We also offer a variety of test preparation workshops including GRE, GMAT, SAT 1, CBEST, CSET, and Engineer-in-Training (EIT) F.E. Review.

Online Learning

In order to meet the growing need for distance learning, CEU has partnered with Gatlin Education Services—the leader in online certification programs to offer a wide variety of online programs. These rigorous online courses provide more flexibility than a traditional classroom setting can, while still delivering the quality education you have come to expect from our programs. For many, online courses are the perfect way to start a new career, enhance marketability, or simply learn a new skill . . .all from the comfort of your home or office!

Corporate Consulting & Training

Through a combination of consulting, training and tools, CEU works to align the corporate learning strategies of our clients to their business strategies. Corporate learning solutions are offered in the following key areas: Geographic Information Systems (GIS); Leadership and Organizational Development and Training, and Food Safety Training.

In addition, many of our on-campus certificates and courses are also available for customization and delivery on-site at corporations and businesses—helping employers stay abreast of advancing technologies, trends and skills essential in today's workplace. Courses may be selected from our list of key program areas or may be chosen from our course catalog where the content and timeframes can be combined, expanded, or streamlined to meet the specific needs of the company.

External Degree Programs

In addition to on-campus certificate programs, we offer two external degree programs designed specifically for working professionals. These credit programs offer many advantages including flexible scheduling and off-campus locations.

- **Bachelor of Architecture Special Session Program:** For the past 20 years, CEU and the Department of Architecture have offered working professionals the opportunity to complete their architectural studies toward the first professional degree in architecture through the Bachelor of Architecture Special Session Program. The Special Session coursework mirrors that of the traditional daytime program, with courses offered at times that are more convenient for working adults.

more >>>

- **Professional MBA (PMBA):** This joint program between the College of Business Administration and CEU holds the distinction of being the only off-campus graduate program offered by Cal Poly Pomona. Established in 1992, the PMBA program is designed for working professionals who may not have time to attend the traditional, full-time, on-campus MBA program. The program is the same as the on-campus MBA program—same faculty, same curriculum, same accreditation, and the same graduation ceremony. The difference is the method of delivery.

Open University

One of the most recognized and important offerings to the local and campus community is the Open University program. Designed so that individuals may enroll in many of the traditional on-campus courses without official university admission, Open University is a popular choice for those who want to develop new career skills, sample a new subject, or take classes while waiting for formal admission to the university. Open University enrollment is offered on a space available basis for all classes.

International Programs

In an effort to expand learning experiences and opportunities both locally and abroad, CEU offers a variety of programs that go beyond the walls of a traditional classroom and offer skills that benefit those working in today's global marketplace.

- **Cal Poly English Language Institute:** The primary focus of the Cal Poly English Language Institute (CPELI) is to prepare international students for academic study at an American college or university. By participating in a variety of activities in addition to classroom sessions, students not only gain the language skills they need to succeed, but they also learn to adapt socially and academically. This acculturation is what sets CPELI apart from many other English language programs.
- **International Training Programs:** CEU has been providing training and managing international assistance and development programs for over a decade. We have worked in or with groups from many countries including China, Bulgaria, Swaziland, Cyprus, Turkey, South Korea and Vietnam. Our programs have spanned topics from agriculture to venture capital.

Center for Training, Technology & Incubation

The Center for Training, Technology & Incubation (CTTi) is currently the headquarters of the College of the Extended University and home to a number of select early stage technology companies.

Initiated by a partnership with NASA and the U.S Economic Development Administration (EDA), CTTi houses the entrepreneurial element of Innovation Village, the 65-acre research park located on the Cal Poly Pomona campus. CTTi offers lease space in flexible sizes inclusive of office, R&D, wet labs and light industrial.

Early stage companies residing at CTTi find an environment that fosters communication among entrepreneurs and facilitates collaboration with Cal Poly Pomona University researchers and students. As a result, a robust technology commercialization infrastructure is in place, capable of facilitating public-private technology development among faculty, students, and private sector entrepreneurs which have the potential to create jobs, revitalize neighborhoods, commercialize new technologies, and strengthen local and national economies.

CTTi has served as the home for numerous start-up companies producing products such as sensors and medical devices, electronic circuitry, telecommunications and chips. A second round of funding by EDA in 2007 will result in the construction of two additional wet labs by early 2009.

College of the Extended University: Program Fact Sheet

College of the Extended University

California State Polytechnic University, Pomona
3801 W. Temple Avenue, Bldg. 220C
Pomona, CA 91768

T: 909.869.2288

F: 909.869.4398

W: www.ceu.csupomona.edu

Number of Students: 3,097 served per year (2007)

Number of Programs: 29 Non-Credit Programs
3 Credit/External Degree Programs

Programs: **Non-Credit**

Business & Administrative Development

Providing intensive, real-world training that individuals can take back to the office and implement immediately. These hands-on courses are taught by industry leaders in the fields of human resource management, consulting, grant writing/management and leadership.

Geographic Information Systems

A unique certificate program that combines instruction in Geographic Information Systems and Science and provides hands-on training in geographic information software.

Personal & Community Enrichment

For individuals looking for non-traditional career opportunities or those wanting to expand their community involvement, these courses cover such subjects as event planning, wedding consulting, and travel study opportunities.

Test Preparation

Our test preparation and study skills courses are designed to familiarize individuals with the most recent exam subject areas, giving important insight into the question types. Perfect for individuals planning to enter college for the first time, or those who want to pursue an advanced degree or professional license.

Trade & Professional Enhancement

These programs prepare individuals for specific jobs that may not require a college degree, and cover such diverse fields as construction trades, heating and air conditioning, landscape technology, health services and many more.

Credit/External Degree

Architecture Special Session Degree Program

The Architecture Special Session Degree Program is designed to help working professionals complete their studies toward the first professional degree in architecture, the Bachelor of Architecture.

Open University

Open University allows individuals to take regular Cal Poly Pomona academic credit courses without going through the formal application process. Units earned through Open University may be applied toward a degree at any one of the Cal State University campuses or at many other four-year public and private universities.

Professional MBA Degree Program

Since 1992, the College of the Extended University and the College of Business Administration have jointly offered a Master's of Business Administration degree program at different locations in major Southland cities. This program caters to those either holding or desiring managerial positions in business, industry, or government.

Specialized Training:

Cal Poly English Language Institute

The Cal Poly English Language Institute (CPELI) prepares international students for academic study in American higher education. Students study language, academic skills, and American culture. The Institute also offers language training to special groups.

International Training Programs

For over a decade, the CEU, through its International Training Programs (ITP), has provided training programs to a variety of clients. During this time, the college has worked with groups from many countries including China, Swaziland, Bulgaria, Cyprus, Turkey, South Korea and Vietnam. Program topics have ranged from agriculture to taxation, public administration and venture capital.

Corporate Consulting & Training

Offering customized, learning and training solutions for companies and non-profit corporations throughout Southern California.
